

XM Radio is terriffic! I enjoy the fact that I can receive commercial free radio, whether it be music or traffic and talk radio, 24 hours a day. I find local radio broadcast annoying and I refuse to listen because I do not want to hear babble and hooping and yelling in the early am as so many radio stations provide. They assume that I want to hear 4-5 people gathering and talking about last nights party, sex, and stupid topics that do not interest me and somewhere they talk about traffic weather but not enough to help me. The only way that I can enjoy the morning commute to work is by music and XM Radio proivdes that for me for a monthly fee. No Government control as they have NO right refusing me of a service that I pay for each month.
